Disclaimer:

1. The visuals are for reference purposes only; actual colors, finishes, and tile dimensions may vary.
2. Shade variation is a natural characteristic of tiles, making each piece unique. We highly recommend a physical inspection for accurate selection. Visit our showroom for the best selection and precise assessment.
3. Tiles with multiple faces exhibit varied patterns, resulting in natural design variations.
4. Prices quoted are subject to change without prior notice. For the best offers and discounts, visit our nearest showroom.

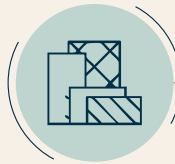

OUR LEGACY

Established over 50 years ago by Late Shri Hiralal Somany father of ceramics in India, SOMANY is a leading brand in the domestic market. SOMANY is renowned for its innovation and excellence, earning the title of "Most Desired Tiles Brand" in India. It has a comprehensive range of products, including ceramic, polished vitrified, and glazed vitrified tiles, as well as bathware and adhesives.

TECHNOLOGIES THAT DIFFERENTIATES US

VC SHIELD

Protection from Abrasion

Experience unrivaled durability and protection with VC Shield Tiles, India's first & the only patented technology, which ensures exceptional abrasion resistance. With a sophisticated satin matte finish, it is the ultimate solution for high-traffic areas.

TEMP SHIELD

Protection from Heat

A perfect solution for sun-facing rooftops, effectively shielding the area below from intense sun heat waves while ensuring optimal protection and comfort. Experience The unparalleled performance with Revolutionary SOMANY Temp Shield Tiles.

SLIP SHIELD

Protection from Slipping & Skidding

Discover Slip Shield Tiles, the perfect choice for safety in wet areas. With a high coefficient of friction and anti-skid properties, our tiles provide superior traction and peace of mind. Create a secure environment with Slip Shield Tiles.

GERM SHIELD

Protection from Germs

Introducing Germ Shield Tiles, your ultimate defense against germs. Specially designed for spaces that demand exceptional cleanliness and hygiene, our tiles provide unparalleled protection. Experience the power of Germ Shield Tiles today.

HYDROPHOBIC

Protection from Water and Moisture

Perfect for protection against moisture and water, Hydrophobic tiles repel water and are resistant to it, the expertly crafted coating creates a barrier that prevents water from penetrating the tile, thereby protecting it from damage caused by moisture.

Central to our operation is the CONTINUA+ integrated plant, utilizing continuous compaction techniques with unique sequencing processes on the conveyor belt. This innovative approach ensures consistent thickness, unparalleled density distribution, reducing porosity while enhancing the surface aesthetics with higher brightness, design clarity, increasing abrasion resistance while reducing energy consumption and minimizing carbon footprint.
